This collection of information is required by 37 CFR 1.137(a). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

**PETITION FOR REVIVAL OF AN APPLICATION FOR PATENT ABANDONED
UNAVOIDABLY UNDER 37 CFR 1.137(a)****3. Terminal disclaimer with disclaimer fee**

- ☒ Since this utility/plant application was filed on or after June 8, 1995, no terminal disclaimer is required.
- ☐ A terminal disclaimer (and disclaimer fee (37 CFR 1.20(d)) of \$ _____ for a small entity or \$ _____ for other than a small entity) disclaiming the required period of time is enclosed herewith (see PTO/SB/63).

4. An adequate showing of the cause of the delay, and that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition under 37 CFR 1.137(a) was unavoidable, is enclosed.**WARNING:**

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

PRELIMINARY AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Dear Sir:

Preliminary to the initial Office Action, please amend the above-identified application as follows:

IN THE CLAIMS

Claims 1-17. (Previously Canceled)

Claim 18. (Currently Amended) A beverage container holder for round and square beverage containers, comprising:

a rectangular basket having four side walls, each having a top edge border which collectively define an open top end and which, in turn, defines a rectangular opening, at least two of said side walls disposed opposite one another each having at least two openings therethrough disposed beneath said top edge border thereof; and

at least four resilient fingers coupled to said rectangular basket and extending inwardly toward said rectangular opening, said at least four resilient fingers being V-shaped to define a point of a V and having a V-shaped profile when viewed in a vertical plane with the point of the V extending generally towards the center of the rectangular opening, said V-shaped fingers each defining an included obtuse angle therebetween, said at least four fingers each being made of a single unitary member cooperating to resiliently and releasably grasp both round and square beverage containers at the point of said V-shaped fingers, said fingers each depending from one of said top edge borders of said opposite side walls such that they each extend downwardly into a different one of said side wall openings; and

a generally U-shaped hook attached to and extending above said basket, wherein

said rectangular basket, said at least four resilient fingers and said generally U-shaped hook are formed as a single unitary member.

Claim 19. (Previously Canceled)

Claim 20. (Previously Amended) A beverage container holder according to Claim 18, wherein said single unitary member is plastic.

Claim 21. (Currently Amended) A beverage container holder for round and square beverage containers, comprising:

a rectangular tray having a top wall having a pair of spaced-apart rectangular openings; and

at least two sets of four resilient fingers coupled to said rectangular tray and said fingers of each set extending inwardly toward a different one of said rectangular openings, said resilient fingers being V-shaped to define a point of a V and having a V-shaped profile when viewed in a vertical plane with the point of the V extending generally towards the center of the respective rectangular opening, said V-shaped fingers each defining an included obtuse angle therebetween, said at least four fingers of each set cooperating to resiliently and releasably grasp both round and square beverage containers at the point of said V-shaped fingers, said fingers each depending from said top wall of said tray[, said rectangular tray and] said [at least two sets of four] resilient fingers are each formed as a single unitary member; and

a supporting member rotatably coupled to said rectangular tray and being pivotable into a position located below said rectangular opening.

Claim 22. (Previously Added) A beverage container holder according to Claim 21, further comprising:

spring means for biasing said supporting member to said position located below said rectangular opening.

Claim 23. (Previously Canceled)

REMARKS

Reconsideration and withdrawal of the final rejection is respectfully requested in view of the foregoing amendments and the following remarks.

Concerning initially the 112 rejection, by this Preliminary Amendment, the recitation in Claim 21 relative to the two sets of four fingers and the rectangular tray being formed of a single unitary member has been deleted. The resilient fingers are each now defined as being formed "as a single unitary member". Claim 18 has been appropriately amended to define each of the four fingers being made of a single unitary member, as well.

In addition, Claims 18 and 21 have been further amended to define the V-shaped fingers as each defining an obtuse angle therebetween, support for which can be seen in Fig. 1. This obtuse angle allows the fingers to be depressed more easily by the cup being inserted into the holder. As will be discussed in greater detail hereinafter, it is respectfully submitted that the prior art neither discloses nor suggests this novel combination of features.

At the outset, Applicant wishes to bring to the Examiner's attention a recent article in Newsday dated May 31, 2004, in which there was reference to the fact that it was difficult to "try jamming one of those square bottles into your car's

cup holder". This merits attention since it goes to the issue of the present invention that current cup holders are not designed to hold both round and square containers. It is respectfully submitted that it is only through hindsight reasoning that the prior art can be constructed in such a fashion as to duplicate Applicant's invention. In any event, the prior art relied upon by the Examiner does not disclose or suggest the invention as now claimed.

In particular, as noted above, the claims now define the use of V-shaped resilient fingers made of one piece which define an obtuse included angle. On the other hand, the German reference discloses fingerse having an included acute angle. The obtuse angle and the provision of V-shaped fingers in this form allow for a more gradual displacement thereof when the cup is inserted. The use of both the integrally formed resilient fingers, each having a V-shaped profile with an obtuse included angle is neither disclosed nor suggested by the references relied upon by the Examiner either applied alone or in combination.

Finally, Applicant hereby requests a three-month extension of time in which to respond to the outstanding Office Action. Credit Card payment form PTO-2038 in the amount of \$475.00 is enclosed to cover the official filing fee. Any fee deficiency or overpayment may be charged or credited to applicant's Deposit Account No. 07-0130.

Accordingly, reconsideration and withdrawal of the rejection and allowance of the claims at an early date is earnestly solicited.

Respectfully submitted,

**DECLARATION IN SUPPORT OF
PETITION FOR REVIVAL OF AN APPLICATION FOR
PATENT ABANDONED UNAVOIDABLY UNDER 37 CFR 1.137(A)**

I, Thomas M. Galgano, do hereby declare:

1. I am the attorney of record for the above-identified Applicant in connection with the above-identified application and I submit this Declaration in support of the Petition for Revival of the above-identified application filed concurrently herewith.

2. A final Office Action in the above-identified application issued on March 4, 2004. On September 7, 2004 Applicant submitted a continuation application together with a Preliminary Amendment and the fee for a three month extension of time (copy attached hereto as Exhibit A).

3. Applicant subsequently received a postcard receipt from the U.S. Patent and Trademark Office indicating that the application had been received on September 7, 2004 and assigned Serial No. 10/935,503 (copy attached hereto as Exhibit B).

4. On July 12, 2005, I received a telephone call from Shirley Steel of the U.S. Patent and Trademark Office regarding the continuation transmittal form that we filed. She indicated that it was improperly entered as an amendment and she needed to correct it. I pointed out to her that there was a final Office Action and we filed a continuation with a three month extension which was mentioned in the transmittal papers and in the Preliminary Amendment. She indicated that on this basis, she would try to expedite the handling of this case and pass it through to the Tech Department for processing.

5. I subsequently received in the mail a Notice of Corrected Application number dated July 13, 2005 indicating that the above-identified application was incorrectly assigned to 09/356,771 and that the U.S. Notice assigning it the number

of 10/935,503 had been vacated (copy attached hereto as Exhibit C). The Notice further indicated that a new filing receipt would be mailed in due course.

6. I subsequently had my office conduct status inquiries into this application and on October 31, 2006 our office was informed by Mrs. Holmes (nee Ms. Steel) that she would e-mail Examiner Shamika Sanders Morrison at Art Unit 3632 and tell her that all correct papers were sent in and that they had originally given us an incorrect serial number.

7. In December, 2006 and January, 2007, my office made further inquiries and we were informed that the case went abandoned for failure to use the proper transmittal form and that it would be necessary to file a Petition to Revive.

8. Under the above circumstances, it would appear that although there was a minor mistake with respect to the transmittal form used with filing the RCE application, Applicant's attorney was subsequently informed by the PTO that the papers were sufficient for filing purposes and not until recently was it learned that the PTO had subsequently reached the opposite conclusion.

9. In view of the above, it is believed that Applicant has shown good cause for revival of the application and to accord the filing of the RCE application, and such action at an early date is earnestly solicited.
